URBANITES DISCONNECT FROM NATURE

By Karen McElroy 2010/02/02

"One of the greatest causes of the ecological crisis is the state of personal alienation from nature in which many people live." - 2004, Christopher D. Reed estimated that over 5.5 billion people - over half the world's population - lived in urban areas. Approximately 75% of urban areas, however, are built in urban areas. Approximately 75% of urban areas, however, are built in urban areas. Approximately 75% of urban areas, however, are built in urban areas.

"Ik zal nooit de dialoog vergeten, die ik in 1948 hoorde tussen een klein Terschellingse meisje in het dorp Midland en haar moeder: 'Waarom kijk je eens wat een zoete rupe?' 'Doodstrappen kind, doodstrappen!' Het hier in werkelijkheid werd doodgetrept, was een kinderlepel."

OUR NATURAL ENVIRONMENT IS REPLACED BY A WORLD OF DESIGN.

PEOPLE KNOW MORE BRANDS AND LOGOS THAN BIRDS OR TREE SPECIES.

Examples of Ammensalism

One of the best examples of ammensalism is the one established between humans and other species under extinction due to human actions like habitat devastation by fires, ecological accidents, pollution of water, etc.

"The more we learn to control trees, animals, atoms and the climate, the more they lose their natural character and enter into the realms of culture."

Solastalgie: heimwee naar een verloren wereld

Het zien veranderen van een landschap door een ramp of mondiale opwarming heeft invloed op de menselijke psyche. Dit heet 'solastalgie'.

Why is the human intervention of nature frowned upon? Aren't humans also a part of nature?

Answer (1 of 7): By the very word "Human intervention" itself, shows maximum level of ignorance and Arrogance of Humans. Intervention? Seriously? The World is over 600 million years old (irrespective of what

What is ammensalism?

Ammensalism is the ecological interaction in which an individual species harms another without obtaining benefit. This type of symbiotic relationship is common, but not considered an important process structuring communities because they are "accidental" and do not benefit the species doing the harm. It is a 0/- relationship.
